# Realtime

Sharing Data

Realtime is the most comprehensive and fully integrated Student System available. But there are still times when you need to extract data or connect to a third-party system

Data Sharing:

While other SIS vendors charge an annual fee for data sharing with other systems, some even encrypt your data so you cannot access it without their billable cooperation! Not Realtime - we include exports and imports and when you need an export or import, we will provide it. We recognize that the data in your Student System is your data. It has been collected and organized to serve the needs of your district. Your information should be easily connected to other systems when needed. If you don't see the vendor you are looking for, just let us know, and we can create a custom export.

The following exports are included in your SIS:

Vendor Exports

Active Dir. Student Sync
Adaptive Education
Aesop Substitute Services
Apple School Manager
Apex Learning
Apptegy Export
Blackboard Export
Blackboard Parent

Link Export
Canvas Export
Care Dox Export
Catapult K12
