

Our fully integrated Gradebook includes a traditional calculating Gradebook and a non-calculating option, to document skills/standards assessments.

Gradebook Module:

With Realtime's Gradebook Module, teachers spend more time on instruction and less on record keeping.

- Student rosters and schedules are maintained by the district staff in charge of scheduling and seamlessly synchronized assuring the Gradebook is up-to-date.
- Teachers are notified of New, Transferred Out, or Dropped students.
- Teachers can create category-based assignments with Due Dates, Assignment Dates, Short Titles, and Long Titles. Teachers can attach links and documents for Parent Portal viewing.
- Teachers use a tool to separate students into color-coded work-groups to indicate differentiated assignments.
- Assignments can be divided into Sets or Units so the teacher can view all student assignments in one Set.
- Assignments can be ungraded or graded. If graded, teachers can use Points, Letters, Percentage, or Checks.
- District Administration has the choice of defining the categories and weights by department, or teachers can set this.
- Settings and categories with weights can be copied from previous years.
- One-click posts Gradebook averages to the progress or marking period grade. This grade can be reviewed and updated by teachers if necessary.
- Create Private or General Notes concerning students.
- Create a unique identifier for each student to sort the student roster in ID order or use the identifier to replace the student's name on listings.

Gradebook

- Student Profile Report will list the student's progress to date within the marking period and can include parent signature and date line if requested.
- Reports include a Blank Worksheet with student names and Course Profiles with Grade analysis.
- Parents have web-based secure access to district-defined Gradebook data via Realtime's Parent Portal
- All assignment data can be copied to other courses taught by the teacher.
- Extra Credit is allowed for all numerically graded assignments.
- When grading an assignment, the SET ALL function allows for quick grade entry.
- Grades of Incomplete, Missing, or Excused are also available.
- Administrators can access the Gradebook and individual student reports.
