# Realtime®

Lesson Planner

Provides ease and power to meet requirements for daily and unit lesson development, including NJSL Standards, administrative review and curriculum alignment.

Lesson Planner Module:

As we have done in all of our products, Realtime brings the ease of fully integrated system to lesson planning.

The Lesson Planner includes powerful tools:

- A suite of functions to develop daily and unit plans in individual, department, or district defined formats.

- Text boxes, such as Objective, Essentials, Assessment, etc. are available for each component of the teacher's plan to allow for organization and easy analysis.

- Full word processor functionality is included.

- Pictures can be included, and files can be attached to a lesson plan.

- Assignments created within the lesson plan can post automatically to the Gradebook and to the Parent Portal's Gradebook and Calendars tabs.

- Several views of the weekly plans can be printed or exported in a Word format. Plans can be viewed individually, by day, by section, or by an entire week in subject or calendar format.

- The Lesson Planner automatically pre-fills courses and sections from the Master Schedule sections.

- For Elementary Schools a calendar view allows subjects and activities to be dragged to the appropriate day and time frame.

- Supervision can approve/disapprove individual lesson plans, or entire weeks of plans and attach appropriate comments or notes to each.

Lesson Planner

This powerful tool facilitates the development of daily and unit lesson plans, correlation with the Core Curriculum Standards, lesson plan sharing and co-development, curriculum warehousing, and a seamless connection to the Gradebook, Student, and Parent Portals.

- Approved lesson plans can be archived in a library to be later recalled by keyword or standard.

- Purchased lesson plans can be posted to the district library for distribution to staff.

- There is an area to record teacher reflection on a given lesson.

- Sharing allows teachers to work together to develop lessons with supervisory approval.

- Team or inclusion teachers can share in the co-development of lessons. Modifications can be highlighted in a contrasting color or background.

- Teacher, department, and district templates may be developed for each text block in the Lesson Planner to ensure consistency across users.
